6. LITERATUR

Abrams RA, Glaubinger D, Appelbaum FR, Deisseroth AB:
Result of attempted hematopoietic reconstitution using isologous peripheral blood mononuclear cells: A case report.

Anderson KC, Weinstein HJ:
Transfusion-associated graft-versus-host disease.

Andrews RG, Singer JW, Bernstein ID:
Monoclonal antibody 12-8 recognizes a 115-kd molecule present on both unipotent and multipotent hematopoietic colony-forming cells and their precursors.

Andrews RG, Singer JW, Bernstein ID:
Precursors of colony forming cells in humans can be distinguished from colony forming cells by expression of the CD33 and CD34 antigens and light scatter properties.

Lack of in vitro colony formation in patients with severe aplastic anemia after autologous hematologic reconstitution.

Bone marrow transplantation (BMT) versus immunosuppression for treatment of severe aplastic anemia (SAA): a report of EBMT SAA Working Party

Response of CFU-GM to increasing doses of rhGM-CSF in patients with aplastic anemia.
Collection of peripheral blood hemopoietic progenitors (PBHP) from patients with severe aplastic anemia (SAA) after prolonged administration of granulocyte colony-stimulating factor.

Treatment of acquired severe aplastic anemia: Bone marrow transplantation compared with immunosuppressive therapy. The European Group for Blood and Marrow Transplantation experience.

Effect of stem cell factor on colony growth from acquired and constitutional (Fanconi) aplastic anemia.
Blood 80: 382-387 (1992)

Ball SE, Gibson FM, Rizzo S, Tooze JA, Marsh J CW, Gordon-Smith EC:
Progressive telomere shortening in aplastic anemia.

Baum CM, Weissmann IL, Tsukamoto AS, Buckle AM, Peault B:
Isolation of a candidate human hematopoietic stem-cell population.

Bell AJ, Hamblin TJ, Oscier DG:
Peripheral blood stem cell autografting.
Hematol Oncol 5: 45-55 (1987)
Bender JG, Unverzagt KL, Walker DE, Lee W, Van Epps DE, Smith DH, Steward CC, To LB:

Brodsky RA, Sensenbrenner LL, Jones RJ:

Champlin RE, Gale RP:
Treatment of aplastic anemia with antithymocyte globulin (abstract). Blood 54 (Suppl.): 58 (1979)

Champlin RE, Nimer SD, Ireland P, Oette DH, Golde DW:

Craddock CF, Apperley JF, Wright EG, Healy LE, Bennett CA, Evans M, Grimsley PG, Gorgon MY:

Craig W, Kay R, Curler RI, Lansdorp PM:

Demuyck H, Pettengell R, de Campos E, Dexter TM, Testa NG:
The capacity of peripheral blood stem cells mobilised with chemotherapy plus G-CSF to repopulate irradiated marrow stroma in vitro is similar to that of bone marrow. Eur J Cancer 28: 381-386 (1992)
Dooley DC, Law P:  
Detection and quantitation of long-term culture-initiating cells in normal human peripheral blood.  

Eaves CJ, Sutherland HJ, Cashman JD, Otsuka T, Lansdorp PM,  
Humphries RK, Eaves AC, Hogge DE:  
Regulation of primitive human hematopoietic cells in long-term marrow culture.  

Mazanet R, Lynch C, Pap S, Pelaez J, Reich E, Critchlow J, Demetr G, Bibbo J, Schnipper L, Griffin JD, Frei III, Antman KH:  
Mobilisation of peripheral blood progenitor cells by chemotherapy and granulocyte-macrophage colony-stimulating factor for hematologic support after high-dose intensification for breast cancer.  
Blood 79: 3036-3044 (1992)

Faille A, Barrett AJ, Balitrand N, Ketels F, Gluckman E, Nagean Y:  
Effect of antilymphocyte globulin on granulocyte precursors in aplastic anemia.  

Fraser CC, Szilvassy SJ, Eaves CJ, Humphries RK:  
Proliferation of totipotent hematopoietic stem cells in vitro with retention of long-term competitive in vivo reconstituting ability.  

Frickhofen N, Kaltwasser JP, Schrezenmeier H, Raghavachar A, Vogt HG,  
Herrmann F, Freund M, Meusers P, Salama A, Heimpel H:  
Treatment of aplastic anemia with antilymphocyte globulin and methylprednisolone with or without cyclosporine. The German Aplastic Anemia Study Group.  

Frickhofen N, Schrezenmeier H, Bacigalupo A:  

Gale RP, Champlin RE, Feig SA, Fitchen JH:  
Sequential in vivo treatment with two recombinant human hemopoietic growth factors (interleukin 3 and granulocyte macrophage colony stimulating factor) as a new therapeutic modality to stimulate hematopoiesis: Result of a phase I study.
Blood 79: 2583-2591 (1992)

Genestier L, Fournel S, Flacher M, Assossou O, Revillard JP, Bonnefoy-Berard N:
Induction of Fas (Apo-1, CD95)-mediated apoptosis of activated lymphocytes by polyclonal antithymocyte globulins.

Gianni AM, Siena S, Bregni M, Tarella C, Stern AC, Pileri A, Bonadonna G:
Granulocyte-macrophage colony-stimulating factor to harvest circulating haemopoietic stem cells for auto-transplantation.

Gordon MY:
Stem cells and the microenvironment in aplastic anemia.

Gordon Smith EC:
Aplastic anemia-aetiology and clinical features.

Gordon Smith EC, Yandle A, Milne A, Speck B, Marmont AM, Willemze R, Kolb HJ:
Randomized placebo controlled study of rhGM-CSF following ALG in the treatment of aplastic anemia.
Bone Marrow Transplant 2 (suppl 2): 78-80 (1991)

Huang AT, Mold NG:
The role of CD45RO in antithymocyte globulin's stimulation of primitive haemopoietic cells.

International Agranulocytosis and Aplastic Anemia Study Group:
Incidence of aplastic anemia: the relevance of diagnostic criteria.
Blood 70: 1718-1721 (1987)

Jenal, M:
Defekt hämatopoetischer Stammzellen bei aplastischer Anämie.
Dissertationsschrift, Universität Ulm (1995)
Juttner CA, To LB, Haylock DN, Dyson PG, Thorrp D, Dasrt GW, Ho JQK, Horvarth N, Bardy P:  
Autologous stem cell transplantation.  

Kern P, Heimpel H, Heit W, Kubanek W:  
Granulocytic progenitor cells in aplastic anemia.  
Br J Haematol 65: 613-623 (1977)

Killik SB, Marsh JCW, Gordon-Smith EC, Sorlin L, Gibson FM:  
Effects of antithymocyte globulin on bone marrow CD34+ cells in aplastic anemia and myelodysplasia.  

Kojima S, Matsuyama T:  
Stimulation of granulopoiesis by high dose recombinant human granulocyte colony stimulating factor in children with aplastic anemia and very severe neutropenia.  
Blood 83: 1474-1478 (1994)

Krause DS, Fackler MJ, Civin CI, May WS:  
CD34: structure, biology and clinical utility.  

Kurtzberg J, Laughlin M, Graham ML, Smith C, Olson JF, Halperin EC, Ciocci G, Carrier C, Stevens CE, Rubinstein P:  
Placental blood as a source of hematopoietic stem cells for transplantation into unrelated recipients.  

Maciejewski JP, Anderson S, Katevas P, Young NS:  
Phenotypic and functional analysis of bone marrow progenitor cell compartment in bone marrow failure.  

Maciejewski JP, Selleri C, Sato T, Anderson CS, Young NS:  
Increased expression of Fas antigen on bone marrow CD34+ cells of patients with aplastic anemia.  

Maciejewski JP, Selleri C, Anderson CS, Young NS:  
Fas antigen expression on CD34+ human marrow cells is induced by interferon gamma and tumor necrosis factor alpha and potentiates cytokine-mediated hematopoietic suppression in vitro.  
Blood 85: 3183-3190 (1995b)
Maciejewski JP, Selleri C, Sato T, Anderson CS, Young NS:
A severe and consistent deficit in marrow and circulating primitive hematopoietic cells (long-term culture initiating cells) in acquired aplastic anemia.

Maciejewski JP, Kim S, Sloand E, Selleri C, Young NS:
Sustained long-term hematologic recovery despite a marked quantitative defect in the stem cell compartment of patients with aplastic anemia after immunosuppressive therapy.

Marmont AM:
The graft versus leukemia effect (GVL) after bone marrow transplantation for chronic myelogeount leukemia.
Leuk Lymphoma 11 (suppl 1): 221-226 (1993)

Unrelated donor bone marrow transplantation to treat severe aplastic anaemia in children and young adults.

Marsh JCW, Chang J, Testa NG, Hows JM, Dexter TM:
The hematopoietic defect in aplastic anemia assessed by long-term marrow culture.
Blood 76: 1748-1757 (1990)

Marsh JCW, Chang J, Testa NG, Hows JM, Dexter TM:
In vitro assessment of marrow stem cell and stromal cell function in aplastic anemia.

Marsh JCW, Gordon Smith EC:
Treatment of aplastic anemia with antilymphocyte globulin and cyclosporin.

Recovery of hematopoietic progenitor cells in patients with severe aplastic anemia who obtained good clinical response with a combination therapy of immunosuppressive agents and recombinant human granulocyte colony-stimulating factor.
Micklem HS, Anderson N, Ross E:
Limited potential of circulating haemopoietic stem cells CBA mica.
Nature 256: 41-43 (1975)

Moore MA:
Stem cell proliferation: ex vivo and in vivo observations.
Stem cells 15: 239-244 (1997)

Moulinex G, Pojda Z, Hampson I, Lord BI, Dexter TM:
Transplantation potential of peripheral blood stem cells induced by colony-stimulating factor.
Blood 76: 2153-2158 (1990)

Nissen C:
Pathophysiology of aplastic anemia.

Notaro R, Cimmino A, Tabarini D, Rotoli B, Luzzatto L:
In vivo telomere dynamics of human hematopoietic stem cells.

Novitzky N, Jacobs P:
Immunosuppressive therapy in bone marrow aplasia: the stroma functions normally to support hematopoiesis.

Passweg JR, Schrezenmeier H, Camitta B, Socie G, Hows J, Rowlings PA, Horowitz MM:
Alternative donor bone marrow transplantation for patients with severe aplastic anemia.

Pettengell R, Luft T, Henschler R, Hows JM, Dexter TM, Ryder D, Testa NG:
Direct comparison by limiting dilution analysis of long-term culture-initiating cells in human bone marrow, umbilical cord blood and blood stem cells.
Blood 84: 3653-3659 (1994)

Philpott NJ, Scopes J, Marsh JC, Gordon-Smith EC, Gibson FM:
Increased apoptosis in aplastic anemia bone marrow progenitor cell.
Possible pathophysiologic significance.

The assessment of the hematopoietic reservoir after immunosuppressive therapy or bone marrow transplantation in severe aplastic anemia.
Standard immunosuppression is superior to cyclosporine / fligrastim in severe aplastic anemia: The german multicenter study.

Richman CM, Weiner RS, Yankee RA:
Increase in circulating stem cells following chemotherapy in man.
Blood 47: 1031-1039 (1976)

Rosenfeld SJ, Kimball J, Vining D, Young NS:
Intensive immunosuppression with antithymocyte globulin and cyclosporine as treatment for severe acquired aplastic anemia.

Schrezenmeier H, Jenal M, Herrmann F, Heimpel H, Raghavachar A:
Quantitative analysis of cobblestone area-forming cells in bone marrow of patients with aplastic anemia by limiting dilution assay.

Scopes J, Bagnara M, Gordon-Smith EC, Ball SE, Gibson FM:
Haemopoietic progenitor cells are reduced in aplastic anemia.

Siena S, Bregni M, Brando B, Belli N, Ravagnani L, Bonadonna G, Gianni AM:
Circulation of CD34+ hematopoietic stem cells in the peripheral blood of high-dose cyclophosphamide-treated patients: Enhancement by intravenous recombinant human granulocyte-macrophage colony-stimulating factor.

Siena S, Bregni M, Brando B, Belli N, Ravagnani L, Gandola A, Ster AC, Lansdorp PM, Bonadonna G, Gianni AM:
Flow cytometry for clinical estimation of circulating hematopoietic progenitors for autologous transplantation in cancer patients.
Blood 77: 400-409 (1991)

Malignant tumors occurring after treatment of aplastic anemia. European Bone Marrow Transplantation-Severe Aplastic Anaemia Working Party.
Sonoda Y, Yashige H, Fujii H, Tsuda S, Naekawa T, Misawa S, Abe T:
Bilineage response in refractory aplastic anemia patients following long
term administration of recombinant human granulocyte colony
stimulating factor.

Storb R, Etzioni R, Anasetti C, Appelbaum FR, Buckner CD, Bensinger W,
Bryant E, Clift R, Deeg HJ, Doney K, Flowers M, Hansen J, Martin P,
Pepe M, Sale G, Sanders J, Singer J, Sullivan KM, Thomas ED,
Witherspoon RP: Cyclophosphamide combined with antithymocyte
globulin in preparation for allogenic marrow transplants in patients with
aplastic anemia.
Blood 84: 941-949 (1994)

Sutherland HJ, Eaves CJ, Eaves AC, Dragowska W, Lansdorp PM:
Characterization and partial purification of human marrow cells capable
of long-term hematopoiesis in vitro.

Sutherland HJ, Lansdorp PM, Henkelman DH, Eaves AC, Eaves CJ:
Functional characterization of individual human hematopoietic stem cells
cultured at limiting dilution on supportive marrow stromal layers.
Proc Natl Acad Sci USA 87: 3584-3588 (1990)

Taswell C:
Limiting dilution assays for the determination of immunocompetent cell
frequencies.

Tisdale JF, Dunn DE, Geller N, Plante M, Nunez O, Dunbar CE, Barrett AJ,
Walsh TJ, Rosenfeld SJ, Young NS:
High-dose cyclophosphamide in severe aplastic anemia: a randomised
trial.

Tong J, Bacigalupo A, Piaggio G, Figari O, Sogno G, Marmont A:
In vitro response of T cells from aplastic anemia patients to
antilymphocyte globulin and phytohemagglutinin: colony-stimulating
activity and lymphokine production.
Hematology 19: 312-316 (1991)

Torok Storb B, Doney K, Brown SL, Prentice RL:
Correlation of two in vitro tests with clinical response to
immunosuppressive therapy in 54 patients with severe aplastic anemia.
Udomsadki C, Lansdorp PM, Hogge DE, Reid DS, Eaves AC, Eaves CJ:
Characterization of primitive hematopoietic cells in normal human peripheral blood.
Blood 80: 2513-2521 (1992)

Young NS, Barrett AJ:
The treatment of severe acquired aplastic anemia.

Young NS, Maciejewski JP:
The pathophysiology of acquired aplastic anemia.
Danksagung

An erster Stelle möchte ich mich bei Herrn Professor Dr. Schrezenmeier für die Überlassung des interessanten Themas, für die sorgfältige Betreuung, für seine große Diskussionsbereitschaft und für die Bereitstellung seines beeindruckenden Literaturwissens herzlich bedanken. Vielen Dank an Prof. Bergmann, unter dessen Leitung der Abteilung Innere Medizin III an der Universität Ulm die Arbeit durchgeführt wurde.

Herzlichen Dank an die unzähligen Quellen in ganz Deutschland, die hier ungenannt bleiben müssen, für die Überlassung der hier untersuchten Blutproben.

Vielen Dank vor allem auch an die technischen Assistentinnen im Labor, Frau Smaragowska und Frau Fischer und die vielen freundlichen Mitarbeiter im Immunphänotypisierungslabor.

Danke an meinen Mann, auch für die Stunden am PC.
